Treasury Financing Operations

November Bond Offering

The Secretary of the Treasury announced on October 26, 1953, an offering on October 28 for cash subscription of an issue of $2 billion, or thereabouts, of fully marketable 2-3/4 percent Treasury bonds, to be dated November 9, 1953, and to mature September 15, 1961. Subscription books were closed at the close of business on October 28.

Subscriptions to the bonds amounted to $12.5 billion and allotments totaled $2.2 billion.

The basis of allotment on subscriptions for the offering was announced by the Treasury as follows: Subscriptions in amounts up to and including $10,000, totaling about $22-1/2 million, were allotted in full. Larger subscriptions from mutual savings banks, insurance companies, pension and retirement funds, and State and local governments, aggregating about $1.8 billion, were allotted 24 percent, and larger subscriptions from all others, including $8-1/4 billion from commercial banks, were allotted 16 percent. For both percentage bases, however, the minimum allotment on any one subscription was $10,000.

Allotments by investor classes were as follows:

Investor classes	Allotments (In millions)
Individuals, partnerships, and personal trust accounts	101.5
Mutual savings banks	164.5
Insurance companies	186.7
Pension and retirement funds	65.3
Commercial banks	1,299.0
Dealers and brokers	170.5
All others	163.2
Unclassified	37.4
Total	2,188.1
Government investment accounts	50.0
Grand total	2,238.1

In accordance with the announcement on October 26, subscriptions from commercial banks, which for this purpose were defined as banks accepting demand deposits, were received for their own account without deposit. A payment of 10 percent of the amount of bonds subscribed for not subject to withdrawal until after allotment was required on all other subscriptions. Any qualified depositary was permitted to make payment by credit for bonds allotted to it for itself and its customers up to any amount for which it was qualified in excess of existing deposits. Subscribers other than commercial banks were permitted to enter subscriptions only for their own account.

Commercial banks and other lenders were requested to refrain from making unsecured loans, or loans collateralized in whole or in part by the bonds subscribed for to cover the 10 percent deposits required to be paid when subscriptions were entered, and a certification that no such loan had been made was required on each subscription entered by a commercial bank for account of its customers.

The Treasury reserved the right to reject or reduce any subscription, and to make different percentage allotments to various classes of subscribers.

Bearer bonds, with interest coupons attached, and bonds registered as to principal and interest were issued in denominations of $500, $1,000, $5,000, $10,000, $100,000, and $1,000,000. Interest on the new bonds will be payable from November 9, 1953, at the rate of 2-3/4 percent per annum, payable on a semiannual basis on September 15, 1954, and thereafter on March 15 and September 15 in each year until the principal amount becomes payable.

Sale of Savings Notes Suspended

On October 23, the Treasury announced the suspension of sale of Treasury savings notes, Series C. In response to press queries it was stated that the suspension was due to two related causes. The first was that the determination of the amount of the Treasury financing in the next week would be difficult in view of the uncertainties of future daily sales of Treasury savings notes under current conditions. The second was that the savings notes could create a problem in connection with the debt limit on the basis of current sales.

Retirement of Portion of Treasury Notes, Series A-1953

On November 9, the Secretary of the Treasury announced that the Treasury on that day had purchased from the Federal Reserve System and retired $500 million of 2-1/8 percent Treasury notes maturing December 1, 1953. Payment was made in effect by the use of gold which was part of the Treasury general fund balance. The use of gold in this way to retire Government securities held by the Federal Reserve System has no effect on bank reserves and therefore is neither inflationary nor deflationary. Payment for the securities was made from Treasury balances in the Federal Reserve Banks; the balances were then restored by the deposit of gold certificates.

This completed the program contemplated in connection with the sale of $2.2 billion of 2-3/4 percent 7-year and 10-month bonds, delivery of

which on November 9 otherwise would have carried the public debt and the guaranteed obligations held outside the Treasury up to or beyond the legal limit.

A substantial excess of expenditures over receipts during the ensuing two months, the announcement stated, was expected to reduce the Treasury balance to the low operating level of about $2 billion early in January. Normally, the Treasury would have taken larger advantage of present very favorable market conditions to borrow enough money to maintain a more adequate balance. Since this was impossible under the present public debt ceiling, it was necessary to put to use a substantial part of the gold in the Treasury general fund.

Treasury 91-Day Bills Refunded

October issues of weekly Treasury bills amounted to $7.5 billion and refunded an equal total of maturing bills. Each offering and maturity amounted to $1.5 billion. The average rates of discount on the new issues were 1.583 percent for October 1; 1.397 percent for October 8; 1.438 percent for October 15; 1.372 percent for October 22; and 1.220 percent for October 29.

Note: Details of Treasury marketing financing operations are shown elsewhere in this issue of the "Treasury Bulletin", in the tables on "Offerings" and "Disposition", respectively, of marketable issues of bonds, notes, and certificates of indebtedness, and in the table "Offerings of Treasury Bills".

1/ For further detail, see tables under "Internal Revenue Collections".

2/ Breakdown between corporation income and profits taxes and individual income tax not withheld is not available prior to July 1953.

3/ Fiscal year 1953 and monthly figures include old-age insurance tax on self-employment income, because this tax is not separable currently from income tax not withheld. Prior fiscal year figures exclude old-age insurance tax, on the basis of estimatee beginning 1952. For further explanation, see footnote 8.

4/ Under Current Tax Payment Act of 1943, as amended (26 U.S.C. 1621-1632). Fiscal year 1953 and monthly figures include old-age insurance taxes on employers and employees, because these taxes are not separable currently from income tax withheld. Prior fiscal year figures exclude old-age insurance taxes, on the basis of estimates beginning 1951. For further explanation, see footnote 8.

5/ Partly estimated beginning January 1951 (see footnote 8). Fiscal year 1953 and monthly figures will not add to this total (see footnotes 3 and 4).

6/ Consists of receipts for old-age insurance, unemployment insurance, and railroad retirement. Beginning January 1951, receipts for old-age insurance are estimated as explained in footnote 8. Railroad unemployment insurance contributions for administrative expenses are included in "other receipts".

7/ Includes proceeds from sale of surplus property and from Government-owned securities; deposits resulting from renegotiation of war contracts (see "Treasury Bulletin" for February 1948, page 5); and repayments on credit to United Kingdom (see Table 4).

9/ Amounts appropriated to the Federal Old-Age and Survivors Insurance Trust Fund are equivalent to the amounts of taxes collected and deposited for old-age insurance (42 U.S.C. 401 (a)). The Social Security Act Amendments of 1950 (Public Law 734), approved August 28, 1950, changed in certain respects the basis of transferring the appropriated funds to the trust fund. Effective January 1, 1951, the old-age insurance taxes on employers and employees and the withheld income tax are paid into the Treasury in combined amounts without separation as to type of tax. The old-age insurance tax on self-employment income, imposed by Public Law 734, is levied and collected as part of the individual income tax, beginning with the taxable year 1951. Beginning January 1951, the amounts transferred currently as appropriations to the trust fund are based on estimates of old-age insurance tax receipts made by the Secretary of the Treasury as required by law, and are adjusted in later transfers on the basis of wage and self-employment income records maintained in the Social Security Administration. For purposes of this table, the amounts credited to the trust fund beginning January 1951 represent estimated receipts of old-age insurance taxes for corresponding periods. Accordingly, these amounts are included under employment taxes and excluded from total income and profits taxes as shown. The breakdown needed for excluding appropriate amounts from individual income tax withheld and not withheld is estimated only on a fiscal year basis. This estimate for 1953 is not yet available. Figures for June 1953 include adjustments by increase in amounts transferred as appropriations as follows: $53 million based on records of self-employment income for calendar year 1951 and $39 million based on records of wages earned in the quarters ending September 30 and December 31, 1952.

9/ Interest on refunds is included in Table 5 under "Miscellaneous".

10/ Expenditures are "net", after allowance for reimbursements to appropriations, receipts of revolving fund appropriations, and receipts credited to disbursing accounts of corporations and agencies having authority to use collections without formal covering into the Treasury. The figures include transfers to trust accounts and net transactions of wholly owned Government corporations and agencies. 1/ Excess of expenditures is covered by appropriations by Congress.

2/ Taxes on employers and employees under the Federal Insurance Contributions Act and later amendments (26 U.S.C. 1400-1432); and tax on self-employment income under the Social Security Act Amendments of 1950 (26 U.S.C. 480-482). The tax on self-employment income is levied and collected as part of the individual income tax beginning with the taxable year 1951. Beginning January 1951, the receipts shown here are based on estimates (see footnote 4).

3/ Tax on employers of 8 or more under the Federal Unemployment Tax Act and later amendments (26 U.S.C. 1600-1611). Figures exclude certain credits not to exceed 90 percent of the total tax which are allowed with respect to contributions by the taxpayer to a State fund under a State unemployment compensation law.

4/ Appropriation to the Federal Old-Age and Survivors Insurance Trust Fund equivalent to the amount of taxes collected and deposited for old-age insurance (42 U.S.C. 401 (a); see also footnote 2). The Social Security Act Amendments of 1950 (Public Law 734), approved August 28, 1950, changed in certain respects the basis of transferring the appropriated funds to the trust fund. Effective January 1, 1951, the amounts transferred currently as appropriations to the trust fund are based on estimates of old-age insurance tax receipts made by the Secretary of the Treasury, and are adjusted in later transfers on the basis of wage and self-employment income records maintained in the Social Security Administration. For purposes of this table, beginning January 1951, the same amount as is credited each month to the trust fund is shown as estimated current tax receipts for old-age insurance.

5/ Interest on refunds is included under "Administrative expenses".

6/ Includes expenditures from appropriations made specifically for administrative expenses relating to the Social Security Act, as amended; administrative expenses reimbursed to the General Fund of the Treasury under Section 201 (f) (1) of the Social Security Act, as amended; administrative expenses under the Wagner-Peyser Act of 1933, as amended (20 U.S.C. 49d); and interest on refunds of social security taxes.

7/ Aid to permanently and totally disabled (Title XIV) as added by Social Security Act Amendments of 1950 (Public Law 734), approved August 28, 1950.

8/ For unemployment insurance and maintenance of public employment offices; includes expenditures made directly by the Federal Government beginning January 1942 for maintenance of employment offices, and expenditures of the U. S. Employment Service for the period December 1942 through June 1948, when it was not in the Bureau of Employment Security.

9/ Total includes expenditures for grants to States, Public Health Service, as follows; 1945, $10.7 million; and 1946, $.2 million. After 1945 expenditures were made under provisions of the Public Health Service Act of 1944 (58 Stat. 682).

1/ Excludes postal savings bonds.

2/ It should be noted that callable issues appear twice in this column, once in the year of first call and again in the year of final maturity. Callable issues with respect to which a definite notice of call has been made, however, are listed as fixed maturities. For date of issue of each security, see "Market Quotations"; for tax status, see "Treasury Survey of Ownership".

3/ Bank restricted issues may not be acquired by commercial banks (with minor exceptions) prior to specified dates; see "Debt Outstanding", Table 2, footnote 1.

4/ Not called for redemption on December 15, 1953. Callable on four months' notice on June 15, 1954, succeeding interest payment date.

5/ Not called for redemption on December 15, 1953. Will mature on June 15, 1954.

UNITED STATES SAVINGS BONDS

United States savings bonds were first offered in March 1935 and began to mature in March 1945. Series A-D were sold between March 1935 and the end of April 1941, and Series E, F, and G were first offered in May 1941. When Series E began to mature on May 1, 1951, owners of the matured bonds were offered three options: To redeem the bonds in cash in accordance with the original terms; to retain them with an extended maturity of 10 years at specified rates of interest accrual; or to exchange them for Series G bonds. A number of changes became effective May 1, 1952. The principal ones were: The rate of interest accrual on Series E was increased, especially for the near term, with corresponding changes in extended Series E; and Series F and G were replaced by two new issues, Series J and K, also at higher interest rates. A new current-income bond, Series H, similar in interest return to Series E, was offered beginning June 1. For details of these changes see "Treasury Bulletin" for May 1952, page A-1. Series F and G began to mature on May 1, 1953. For the exchange offering made to holders of these bonds maturing through December 31, 1953, see the May 1953 issue, page A-1. In the tables which follow, Series A-F and J sales are included at issue price and total redemptions and amounts outstanding at current redemption values. Series G, H, and K are included at face value throughout. Matured bonds which have been redeemed are included in redemptions. Matured F and G bonds outstanding are included in the interest-bearing debt until all bonds of the annual series have matured, when they are transferred to matured debt upon which interest has ceased.

1/ Details by series on a cumulative basis and by periods for Series A-D combined will be found in the February 1952 and previous issues of the "Treasury Bulletin".

2/ Includes exchanges of matured Series E bonds for Series G bonds beginning May 1951 and for Series K bonds beginning May 1952.

3/ Includes both matured and unmatured bonds; see Table 4.

4/ Because of a change in procedure in July 1953 for processing redeemed savings bonds, the amount of redemptions not yet classified at the end of July as between matured and unmatured was larger than normal. This situation was reversed in subsequent months as these redemptions were classified. Since the unclassified redemptions are included in these tables at issue price, the relation between issue price and accrued discount is somewhat distorted also.

5/ Sales began June 1, 1952.

6/ Comparable data are not available prior to January 1950.

7/ Includes redemptions not yet classified between matured and unmatured.

8/ Includes exchanges of Series 1941 F and G savings bonds for Treasury 3-1/4% bonds of 1978-83.

* Less than $500,000.

TREASURY SAVINGS NOTES

Treasury tax and savings notes have been issued as follows: Tax Series A from August 1, 1941, through June 22, 1943; Tax Series B from August 1, 1941, through September 12, 1942; Savings Series C (originally designated Tax Series C) from September 14, 1942, through August 31, 1948; Savings Series D from September 1, 1948, through May 14, 1951; Savings Series A from May 15, 1951, through May 14, 1953; and Savings Series B beginning on May 15, 1953.

Details concerning terms and conditions for purchase and redemption and information on investment yields of Savings Series B appear in the June 1953 issue of the "Treasury Bulletin", page A-1. Similar information with respect to the offering of the earlier series was published currently in the "Treasury Bulletin", and appears also in the "Annual Report of the Secretary of the Treasury" for appropriate years.

In the following tables sales and redemptions of Treasury savings notes are shown at par value. Matured notes redeemed (either for cash or for tax payment) are included in the figures on redemptions. Matured notes outstanding are reflected in the interest-bearing debt until all notes of the annual series have matured, when they are transferred to matured debt upon which interest has ceased.

1/ Excludes trust departments.

2/ Includes trust companies and, beginning with figures for July 1949, also includes stock savings banks. Formerly these banks were shown as a separate classification, but they are no longer so reported.

3/ Includes those banks and insurance companies not reporting in the Treasury Survey.

4/ United States savings bonds, Series E, F, and J, are shown at current redemption values. They were reported at maturity value by the banks and insurance companies included in the Treasury Survey but have been adjusted to current redemption values for use in this statement.

5/ Holdings by reporting agencies not available.

6/ Excludes guaranteed securities held by the Treasury.

7/ Issues which commercial banks may not acquire prior to specified dates (with minor exceptions); see "Debt Outstanding", Table 2, footnote 1.

8/ Federal securities fall into three broad classes with respect to the imposition of Federal income taxes on income derived from them. "Wholly" tax-exempt securities are those with the income exempt from both normal tax and surtax. "Partially" tax-exempt securities are those with the income exempt from the normal tax except that in the case of partially tax-exempt Treasury bonds, interest derived from $5,000 of principal amount owned by any one holder is also exempt from the surtax. "Taxable" securities are those with the income subject to normal tax and surtax.

9/ Includes Federal Housing Administration debentures; see footnote 10.

10/ A small indeterminate amount of these debentures is partially tax-exempt.

11/ Includes $128.0 million depositary bonds held by commercial banks not included in the Treasury Survey.

12/ The proprietary interest of the United States in these banks ended in July 1951.

13/ Excludes issues completely held by Farm Credit Administration agencies. The proprietary interest of the United States in these banks ended in June 1947.

* Less than $500,000.

1/ Beginning April 1953, Treasury bond yields are reported to the Treasury by the Federal Reserve Bank of New York, based on closing bid quotations in the over-the-counter market. Yields for prior periods were computed on the basis of the mean of closing bid and ask quotations. For definition of taxable bonds, see footnotes to the "Treasury Survey of Ownership" in this issue of the "Treasury Bulletin".

2/ Prior to April 1953, the single series on long-term taxable Treasury bonds included the following: April 1952 through March 1953, bonds neither due nor callable for 12 years; October 1941 through March 1952, bonds neither due nor callable for 15 years. For a discussion of the composition of these Treasury bond averages, see the "Treasury Bulletin" for March 1944, page 58.

3/ Moody's Investors Service average of Aaa corporate bonds. This series supersedes the Treasury average of high-grade corporate bonds previously shown in this table, which was discontinued after March 1953.

4/ The long-term taxable Treasury bond average was revised beginning April 1, 1952, see footnote 2. The old average for April 1952 was 2.62 percent.

Source: Daily Treasury Statement for total receipts from internal revenue; reports by the Internal Revenue Service for collections by type of tax. Detail by type of tax is available only on a collection basis. Receipts on the Daily Treasury Statement basis are compiled from the latest daily reports from Government depositaries; they do not coincide with amounts reported by the Internal Revenue Service because of the lag in deposite of collections and because certain taxes are paid directly into the depositaries.

1/ Excludes collections for credit to certain trust accounts for island possessions; includes corporation income tax on Alaska Railroad (repealed by Public Law 386, approved June 10, 1952, for taxable years ending after that date).

2/ Includes excess profits taxes formerly shown separately as follows: unjust enrichment through 1947 (thereafter these collections are included under "Miscellaneous taxes"); declared value (repealed for years ending after June 30, 1946); Excess Profits Tax Act of 1940 (Title II of the Second Revenue Act of 1940, which was repealed for years ending after December 31, 1945). Includes also excess profits taxes on Army and Navy contracts under the Vinson Act as amended (34 U.S.C. 496) and income tax on business income of exempt organizations, imposed by the Revenue Act of 1951, approved October 20, 1951.

3/ Monthly and fiscal year 1953 figures include old-age insurance tax on self-employment income, which is levied and collected as part of the individual income tax beginning with the taxable year 1951. Fiscal year figures prior to 1953 exclude this tax, on the basis of estimates beginning 1952, and it is included under "Old-age insurance taxes". The estimate for 1953 is not yet available.

4/ Withheld income tax and old-age insurance taxes on employers and employees are paid into the Treasury in combined amounts beginning January 1951, so that current collections are not separable as to type of tax. The breakdown is estimated for fiscal years beginning 1951, but the estimate for 1953 is not yet available.

5/ Repealed for years ending after June 30, 1945. Beginning July 1950, included under "Miscellaneous taxes".

Data relating to claims on foreigners and liabilities to foreigners, and capital movements between the United States and foreign countries, have been collected since 1935, pursuant to Executive Order 6560 of January 15, 1934, and Treasury regulations thereunder. Information covering the principal types of data and the principal countries is reported each month by banks and bankers and securities brokers and dealers in the United States. This information is published regularly in the "Treasury Bulletin". Supplementary information is published at less frequent intervals. All reports are made initially to the Federal Reserve Banks, which forward consolidated figures to the Treasury.

The term "foreigners" as used in these reports covers all institutions and individuals (including United States citizens) domiciled outside the United States, as well as international organizations, wherever domiciled, created by treaty or convention between sovereign states. "Short-term" refers to original maturities of one year or less, and "long-term" refers to all other maturities. A detailed discussion of the reporting coverage, basis of reporting, and derivation of capital movements figures appeared in the April 1950 issue of the "Treasury Bulletin", pages 50-52. Revised report forms and regulations became effective with the data for January 1950. Attention is called to the fact that although the grand total figures on the revised reporting basis are reasonably comparable with those for preceding months, data for individual countries in some instances are not comparable because of certain changes in coverage and geographical classification.

The supplementary information, contained in Section IV, is presented in three tables appearing at different times. Table 1 gives data by countries on short-term claims on and liabilities to foreigners as reported quarterly by exporters, importers, and industrial and commercial concerns in the United States. This information was published for the first time in the October 1949 issue of the "Treasury Bulletin" and begins with data for September 30, 1946. Table 2 supplies information by countries on long-term claims on and liabilities to foreigners as reported by banks and bankers in the United States. This table appeared for the first time in the December 1949 issue. Data are for the end of the calendar year beginning with 1942. Table 3 gives information on short-term liabilities to countries not regularly reported separately by banks and bankers. This table appeared for the first time in the April 1950 issue. The data have been requested at irregular intervals, the earliest date being October 1943.
